KENJI TAKAHASHI

·· ·· | Lead AI Systems Architect

kenji.takahashi@tokyo-ai.jp | +81-3-5555-0199 | Tokyo, Japan

PROFESSIONAL SUMMARY | ····

AI systems architect with 9+ years delivering low-latency machine learning inference pipelines and distributed robotics perception models in Tokyo. ??????????????????????????

WORK EXPERIENCE | ··

Rakuten AI Laboratories · Principal Machine Learning Architect

Tokyo, Japan | 2020 · Present

- ? Architected large-scale e-commerce recommendation models processing 65M daily user requests.
- ? Optimized deep learning tensor inference latency from 120ms to 18ms using TensorRT and Triton.
- ? Managed a bilingual engineering team of 14 researchers and software engineers.

Sony Robotics Technologies · Senior Systems Engineer

Tokyo, Japan | 2016 · 2020

- ? Developed real-time stereo vision sensor fusion drivers for autonomous robotics platforms.
- ? Implemented deterministic C++ communication middleware using ROS 2 and zero-copy shared memory.

EDUCATION | ··

University of Tokyo (····)

Master of Information Science and Technology | 2014 · 2016

TECHNICAL SKILLS | ·····

PyTorch, TensorRT, Triton, C++, Python, ROS 2, Docker, CUDA, Linux, Git
