TARIQ AL-HASSAN

VP OF ARTIFICIAL INTELLIGENCE & MACHINE LEARNING PLATFORMS

Seattle, WA • +1 (206) 555-0184 • tariq.alhassan@example.com • linkedin.com/in/tariq-ai-dummy

EXECUTIVE SUMMARY: Technology Executive with 12+ years scaling deep learning systems, ML infrastructure, and distributed GPU compute platforms. Led engineering teams of 70+ engineers and research scientists while delivering generative AI models serving 25M+ active users.

EXECUTIVE LEADERSHIP & IMPACT

VP of Machine Learning Platform — Cerebro Analytics
2022 – Present | Seattle, WA

• Governed $22M annual compute budget across AWS and NVIDIA DGX SuperPOD clusters.
• Directed engineering of high-throughput LLM serving stack, cutting model latency by 55%.
• Scaled org from 18 to 72 engineers across ML Systems, Data Platform, and Research.

Director of Applied AI — Horizon Autonomous Systems
2018 – 2022 | San Francisco, CA

• Built real-time computer vision inference stack operating at 60 FPS on edge hardware.
• Filed 6 patents in neural network quantization and sparse attention mechanisms.

KEY LEADERSHIP METRICS

• **$22M** Annual Compute Budget Managed
• **72** Engineers & Researchers Led
• **6** Granted US Patents in ML / Vision
• **25M+** Generative AI End-Users

TECHNICAL GOVERNANCE

• PyTorch, Triton Inference Server, Ray
• CUDA Optimization, TensorRT, vLLM
• Large-Scale Foundation Model Training
• AI Safety, Red Teaming, Governance

EDUCATION

Ph.D. in Computer Science (Machine Learning)
University of Washington (2018)
B.S. in Electrical Engineering
Georgia Institute of Technology (2013)
